Economics (/ ? k ? ? n
? m ? k s, i? k ?-/) is a
social science that

studies the production,
distribution, and
consumption of goods
and services..

Economics focuses on
the behaviour and
interactions of
economic agents and

how economies work.
When people refer to
"economics" today,
what is usually mean
is mainstream
economics, rather than
heterodox economics.

economics including the basic economic problem, factors of production, opportunity cost and production possibility curves. 2 The allocation of resources

The fundamental principles of resource allocation are considered through the price mechanism in a market economy.

Economics is a story
about the hypothetical
village of Palampur.
There are basic
assumptions that are
taken about Palampur.

These assumptions state that the village has a fairly well-developed system of roads, transport, electricity, irrigation, education and health-

care.
