quality, after market low-noise, pre-amp level signal that can be fed to amplifiers and speakers. You may also add an optional ACR-1, remote level control, so you can adjust the output of the bass channels from the convenience of the driver's seat. With the LC7i you have a high performance audio system while maintaining the features ...

A subwoofer (or sub) is a loudspeaker designed to reproduce low-pitched audio frequencies known as bass and sub-bass, lower in frequency than those which can be (optimally) generated by a woofer. The typical frequency range for a subwoofer is about 20–200 Hz for consumer products, below 100 Hz for professional live sound, and below 80 Hz in THX-certified systems.

The Sonos Amp comes with stereo RCA audio Line-In inputs so you can use legacy components such as a turntable, CD player, or cassette player. 2. It can also be used as a small footprint 5.1 home theater receiver by using two wired speakers as the right and left fronts, adding a standard RCA wired powered subwoofer, and using two Sonos Play:1 speakers as the wireless surrounds.
