Economic benefits that would be obtained (Section 3.5.3), climate change 'hotspots' that could be avoided or reduced (Section 3.5.4 as guided by the assessments of Sections 3.3, 3.4 and 3.5), and tipping points that could be circumvented (Section 3.5.5) at 1.5°C compared to higher degrees of global warming are all examined.

Toledot, Tol'dot, Toldos, or Tol'doth (????????? ? — Hebrew for "generations" or "descendants," the second word and the first distinctive word in the parashah) is the sixth weekly Torah portion (????????? ?, parashah) in the annual Jewish cycle of Torah reading. The parashah tells of the conflict between Jacob and Esau, Isaac's passing off his wife Rebekah as his sister ...

ASCII (/ ? æ s k i? / ASS-kee),: 6 abbreviated from American Standard Code for Information Interchange, is a character encoding standard for electronic communication. ASCII codes represent text in computers, telecommunications equipment, and other devices. Most modern character-encoding schemes are based on ASCII, although they

support many additional characters.

(36) “Psychiatrist” means a medical practitioner licensed under chapter 458 or chapter 459 for at least 3 years, inclusive of psychiatric residency. (37) “Public facility” means a facility that has contracted with the department to provide mental health services to all persons, regardless of ability to pay, and is receiving state funds for such purpose.

The risk of commercial sexual exploitation and sex trafficking among homeless youth increases with a prior history of sexual abuse, as does greater sexual risk taking (e.g., having multiple partners, having unprotected sex) (Raj et al., 2000; Rotherham-Borus et al., 1996) (see also the section on child maltreatment above).

Incremental warming from 1.5°C to 2°C would lead to significant increases in temperature and precipitation extremes in many regions (Chapter 3, Section 3.3.2, 3.3.3). Those projected changes in climate extremes under both warming levels, however, depend on the emissions pathways, as they have different greenhouse gas (GHG)/aerosol forcing ratios.

As discussed in earlier chapters, the misuse of alcohol and drugs and substance use disorders has a huge impact on public health in the United States. In 2014, over 43,000 people died from a drug overdose, more than in any previous year on record² and alcohol misuse accounts for about 88,000 deaths in the United States each year (including 1 in 10 total deaths among working-age adults).⁴ The ...

27/1/2021 · On the basis of NHANES 2007 to 2014, the overall prevalence of MetS was 34.3% and was similar for males (35.3%) and females (33.3%). The prevalence of MetS increased with age, from 19.3% among people 20 to 39 years of age to 37.7% for people 40 to 59 years of age and 54.9% among people ≥60 years of age.

19/4/2021 · Chapter 3: New Opportunities for Canadians . In planning for Canada's economic recovery, the government's first order of business is to heal the specific wounds of the COVID-19 recession. The impact has been even more uneven than previous recessions. Some sectors, many large businesses, and many wealthier Canadians have done quite well.
