Microeconomics is a
branch of mainstream
economics that studies
the behavior of
individuals and firms

in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms.

Microeconomics

focuses on the study of individual markets, sectors, or industries as opposed to the national economy as whole, which is studied in ...

Economics is the study of how individuals, businesses and governments choose to allocate resources to best satisfy their objectives. The study

of economics serves a number of purposes: it helps students understand the functioning of markets, of firms and of financial organizations; it helps

students understand
public debate about
economic policy,
