Youngsters answer 10 questions about a variety of science themes, draw the other half of an insect, and perform a math problem asking how many legs 2,313 insects 1. Mendel invented the dihybrid cross to determine if different traits of pea plants, such as flower color and seed shape, were inherited independently. - 8 -6 -4 -2 2 4 6 8 Answer each problem related to the key terms of the lesson.

# Independent practice lesson 2 powers and exponents answer key

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.

Bible and Science and Health with
